## LETTER FROM THE CHAIRMAN

José Manuel Entrecanales  
Chairman of ACCIONA Energía

This first *Sustainability Report* of ACCIONA Energía contains the balance of an unprecedented year. Since the company began construction on its first wind farm in Spain at the beginning of the 90's, the concentration of carbon dioxide in the atmosphere has grown 50% higher than before the Industrial Revolution. The consequences are visible and dramatic, with extreme climatic events in different parts of the world, desertification and loss of biodiversity.

However, 2021 also closed with encouraging data: several countries representing 90% of the global wealth creation in terms of Gross Domestic Product are committed to achieving climate neutrality by 2050. However, this glimmer of hope will also be a huge challenge.

ACCIONA Energía is the largest 100% renewable energy company with no fossil fuel legacy in the world<sup>1</sup>; we offer solutions to the challenges that humanity faces, with projects and technologies that contribute to the decarbonisation of the economy, regenerating the habitats of the planet and creating more and better future opportunities.

This *Sustainability Report 2021* contains the main actions that we implemented to develop this corporate commitment, which is also a personal one, to build a better planet.

<sup>1</sup> Excluding China

### THE YEAR ZERO OF A NEW STAGE

Of the events that occurred in 2021 I would like to highlight two milestones which, despite their different nature, illustrate the priorities of our company.

#### Strengthening our capacity to contribute solutions for the decarbonisation of the economy

The company's initial public offering in July meant a big internal effort over five months to prepare and carry out the largest initial public offering of a renewable energy company since 2016, with the success of all shares being bought in less than 24 hours.

The implementation process added value to the solid track record of the company and its only profile in a very limited universe of listed companies with our characteristics.

Becoming a listed company enables us to take advantage of an exceptional window of opportunity linked to the construction of a low carbon economy, thanks to a business model based only on renewable energies, with no fossil fuel legacy, vertically integrated and strongly diversified in technologies, geographies and solutions, having accumulated a solid track record and a know-how of more than 30 years.

The strength and ESG credentials of ACCIONA Energía facilitates access to competitive financing which will enable us to accelerate growth and reach our target of doubling our size to achieve 20 GW of installed power by 2025. Furthermore, it will increase our capacity to make the necessary investments to contribute to the maturity of emerging technologies such as green hydrogen, floating offshore wind energy, hybridisation and storage solutions.

The effort put into the initial public offering meant a big step towards our aim of becoming an integral ally for the decarbonisation of the economy, with a global portfolio of competitive technological solutions. Companies acknowledge us as such: in 2021 we were one of the 10 electricity companies worldwide that signed the largest number of long-term renewable energy purchase agreements.

### A benchmark for sustainable investment

The bylaws of ACCIONA Energía, approved in 2021, owing to the company's incorporation as an independent enterprise, contain the present and future alignment of its activities with sustainable development models and underline the company's commitment to all stakeholders, placing them all on the same level.

To ensure compliance with this corporate object, the sustainability policies which govern the company must be strictly, precisely implemented with a degree of supervision similar to that of economic-financial indicators.

For this purpose, ACCIONA Energía has integrated the finance and sustainability teams, both in their management bodies under the leadership of the Chief Financial and Sustainability Officer, and in the governing bodies, with the creation of the Audit and Sustainability Committee, which will allow us to be more efficient in the implementation of our sustainable growth strategy.

## DEPLOYMENT OF OUR SUSTAINABILITY MASTER PLAN

This Sustainability Report 2021 describes in detail the results of the first year as a listed company and the degree of implementation of the commitments defined in the 2025 Sustainability Master Plan.

In 2021 the People programme was consolidated as a proposal of value to employees, significantly contributing to one of the SMP pillars: putting **People at the Centre**. Also, we approved our Human Rights Policy, defined the due diligence strategy, and implemented the Internal Control System for Social Safeguards.

Regarding the **Planet Positive** dimension, we avoided the emission into the atmosphere of 13.4 million tonnes of CO<sub>2</sub>, by generating 24.5 TWh of renewable energy. We also reduced our Scope 1 and 2 emissions by 44% compared to the previous year, in line with the commitments adopted by ACCIONA Energía with the Science Based Target initiative (SBTi).

Scope 3 emissions increased by 37% following higher purchasing intensity to deploy our growth plan and will be, no doubt, a focal point of action and improvement in the coming years.

34% of the water that we consumed came from a recycled source, thus reducing by 35% water consumption in water-stressed countries.

Regarding waste, 97% of non-hazardous waste was recovered and we reduced by 49% the generation and despatch of such waste to landfill compared to the previous year.

Our commitment with the regeneration of habitats in the surroundings of our facilities, was materialised by planting 127,594 trees in Spain, for the reforestation of burnt Public Utility Mountains, in Mexico, reforesting abandoned areas surrounding the wind farms of Oaxaca, and in India. More than half of these trees, 74,947, are not linked to compensatory measures in our facilities.

As for innovation, under the pillar of **Exponential Leadership** of the SMP 2025 and as part of our permanent commitment to innovation, we assigned more than 90 million euros to 60 innovation projects focused, among other things, on extending the useful life of our assets, storing and producing renewable hydrogen.

Finally, under the pillar of **Integrate to Transform**, we developed social impact management projects in 36 facilities in 10 countries, implementing a total of 168 social initiatives.

## KEEP BUILDING FUTURE OPPORTUNITIES

We were pioneers in the mid-90's in the development of renewable technologies, when its disruptive and revolutionary potential to solve the challenges posed to humanity was still unknown.

Our quest is now to carry on leading the fight against the climate emergency, focusing not only on our core technologies, but also being pioneers in a new generation of technologies and solutions that mean a qualitative leap in decarbonisation, such as energy-efficient services, infrastructure to charge electric vehicles and supply of green hydrogen, that will be important vectors for the decarbonisation of the economy.

As a company, we had that vision more than thirty years ago and we find ourselves today at the right time and in the right position to have a leading role in the sustainable transformation of the economy.

Thanks to this *Sustainability Report*, I have the opportunity to show my appreciation for the professionals, shareholders and clients of ACCIONA Energía who have been with us and have guided us to this moment, and I ask you to endorse this target with your effort and trust.

## 2. ONLY IN RENEWABLES

### More than 30 years boosting the decarbonisation of the economy

ACCIONA Energía is the largest global energy operator exclusively dedicated to renewable energies, with no ties or legacy related to fossil-fuel technologies.

### RENEWABLE ENERGY FOR A SUSTAINABLE PLANET

ACCIONA Energía is present in 16 countries on five continents and is exclusively dedicated to renewable technologies, with which it produces clean energy. It has a unique company profile, integrated in all the phases of the value chain: development, financing, engineering and construction, procurement, operation, maintenance and the marketing of energy. All of this, combined with an ongoing commitment to innovation, places the company in a unique position to lead the transition process to a decarbonised and electrified economy, supported by renewable energy sources.

The company owns renewable electricity generation assets which amount to 11,245 MW, of which 78% are from wind power, 13% photovoltaic, 8% hydroelectric and the rest corresponds to facilities in biomass and solar thermal energy plants. Its renewable capacity allows it to produce more than 24.5 TWh per year and supply an equivalent to the consumption of more than 7.5 million homes. Half of the capacity is in Spain and the rest internationally, distributed among fifteen countries: Australia, United States, Canada, Mexico, Costa Rica, Chile, Portugal, Italy, Hungary, Poland, Croatia, Ukraine, India, South Africa and Egypt.

	2020 ↓	2021 ↓
Turnover (million €)	1,769	2,472
EBITDA (million €)	868	1,086
Installed capacity (MW)	10,694	11,245
Total production (GWh)	24,075	24,541
Workforce	1,543	1,762

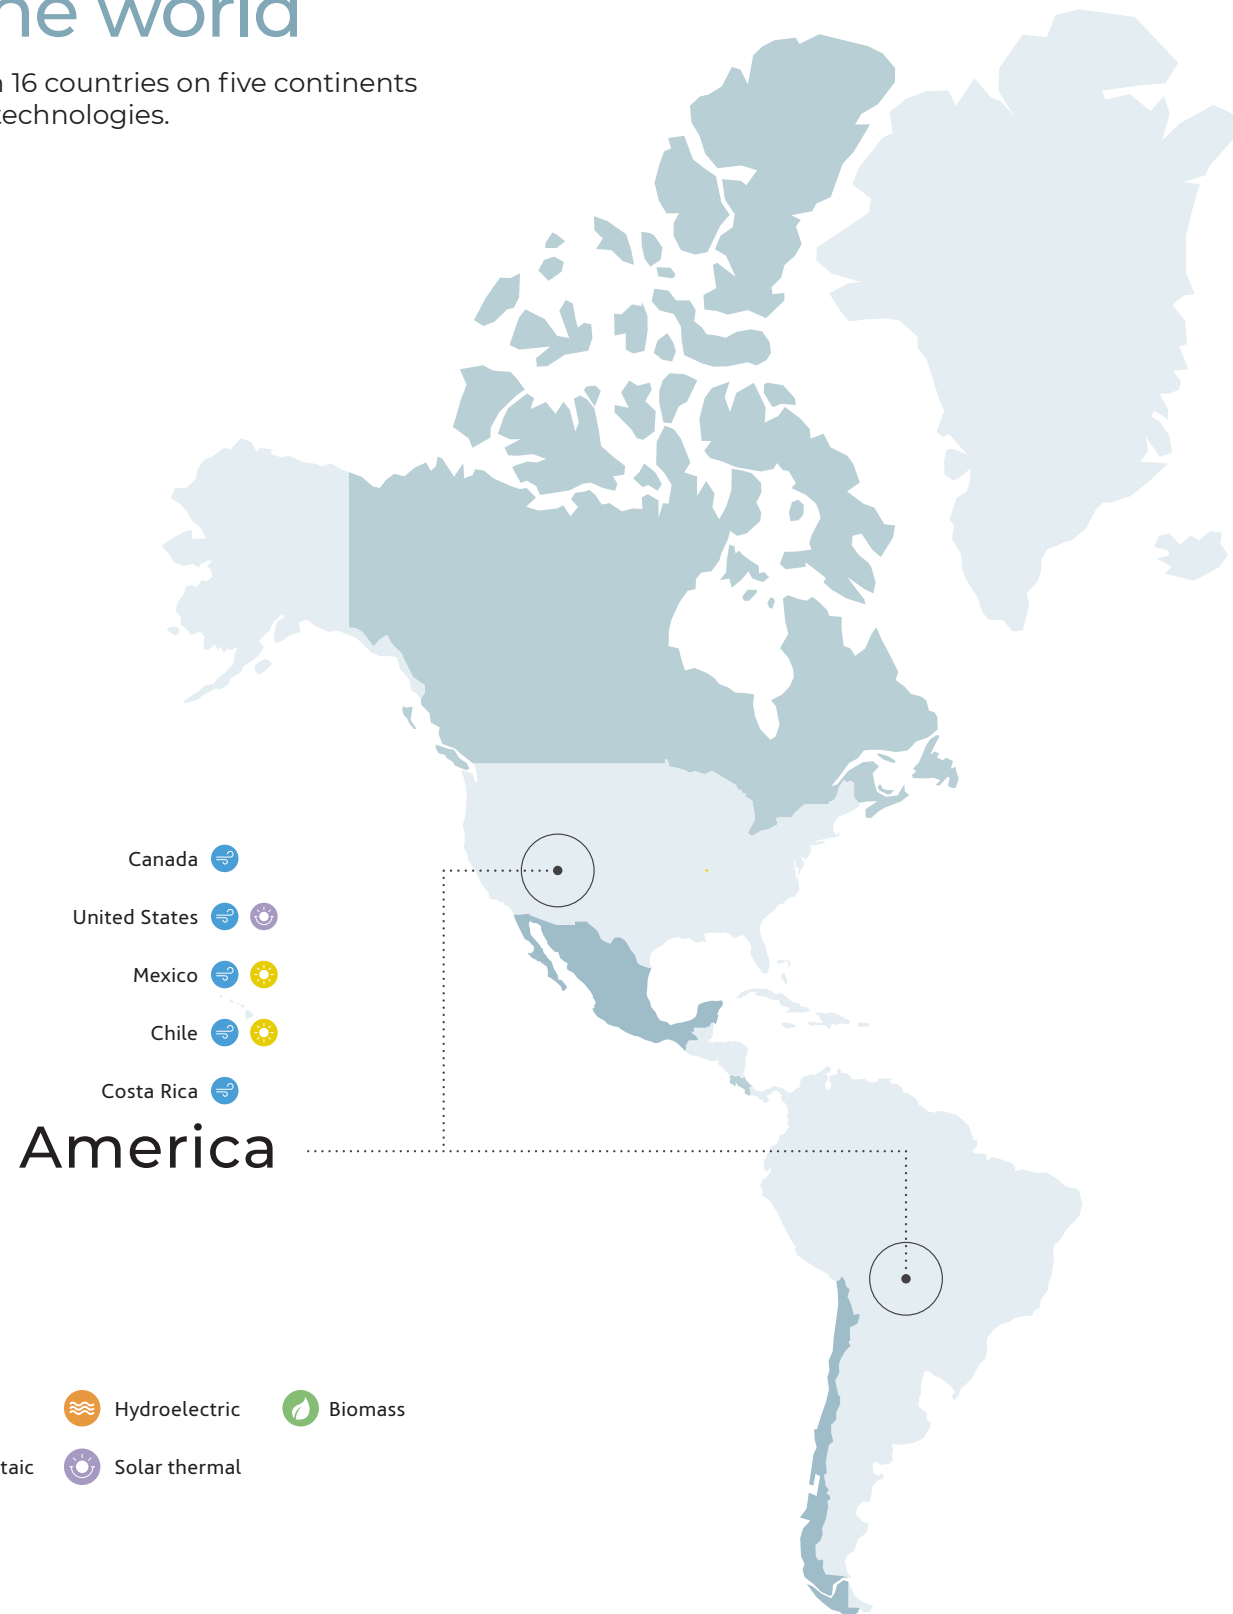

2021 was marked by the initial public offering of 17.25% of the company's shares, previously owned by ACCIONA S.A., which still retains the remaining shares. With this operation the intention is to reduce financial expenses and increase the company's balance sheet capacity to accelerate growth.

### Value chain

Project development	Engineering and construction	Supply chain	Operation and maintenance and management of assets	Energy management

### 3. DEGREE OF FULFILMENT OF COMMITMENTS

#### Sustainability Management

ACCIONA Energía has created a model for monitoring and managing its sustainability commitments, with the main objectives being transparency and exponential improvement.

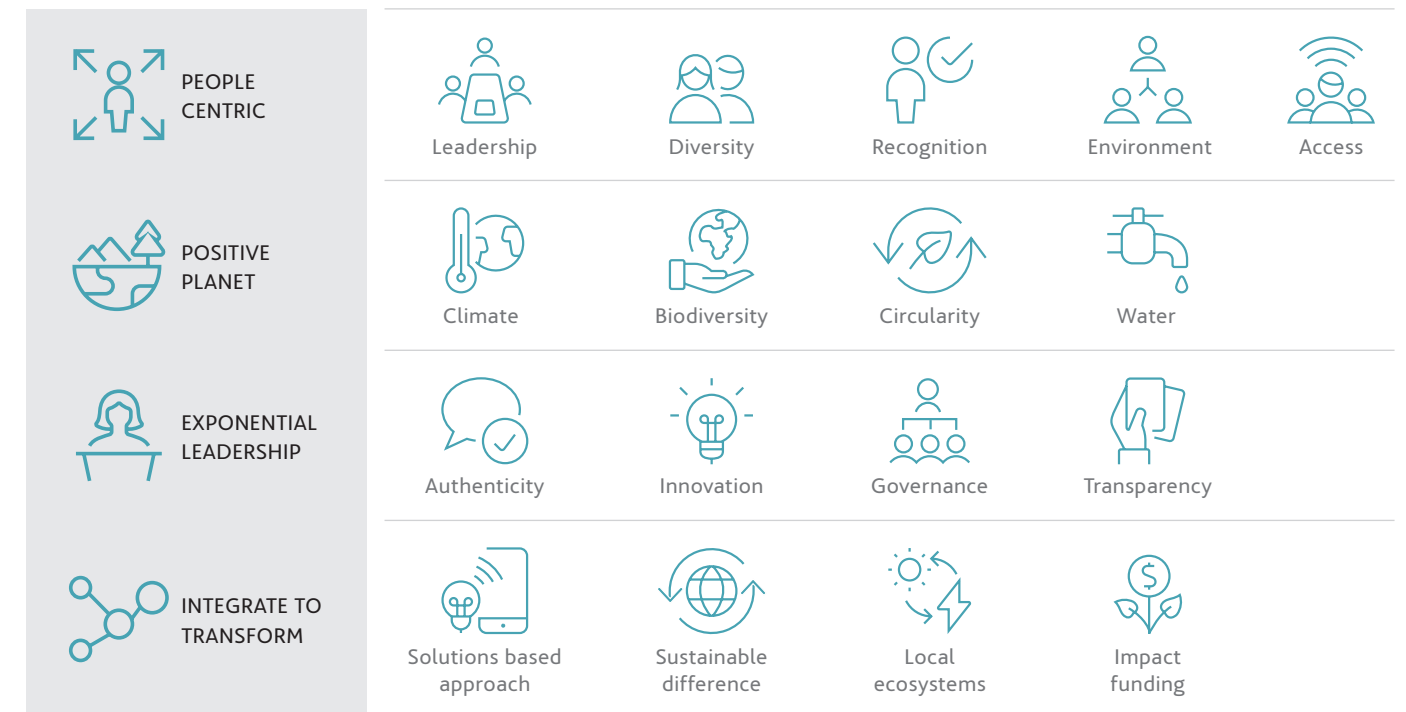

#### SMP 2020-2025: WE MUST SPEED UP AND WE HAVE A PLAN

ACCIONA Energía’s sustainability strategy is based on five-year Sustainability Master Plans (SMPs). The actions and targets contained in these plans are promoted, approved and supervised by the Board of Directors’ Audit and Sustainability Committee.

The implementation of the company’s sustainability strategy and the meeting of commitments are linked to a percentage of the bonuses received by directors, managers and some technical and support staff. In this annual evaluation, the achievement of sustainability targets such as the reduction of greenhouse gas emissions, the reduction of the frequency rate of occupational accidents or objectives linked to gender equality are considered.

The purpose of the SMP 2025 is to encourage ACCIONA Energía to reimagine energy infrastructures. The company invests in, develops and operates infrastructure assets that can make our planet sustainable. In short, making the enterprise a recognised leader in developing basic infrastructure assets with an added value, with people and the planet in mind; in a word, regenerative.

Each of the four SMP 2025 pillars has several areas of action and a marked pathway that includes responsible to resilient activities, and those that contribute a regenerative impact. These are the pillars:

#### BALANCE OF ADVANCES IN THE SMP 2025

The strategic lines take the form of levers for transformation and indicators of improvement proposed by the areas with direct responsibility for them. The objectives will be reviewed to raise the level of ambition if necessary.

In 2021, the first year of the SMP 2025, about 30% of the levers were totally activated. 55% of them were partially activated and the remaining 15% is expected to be activated in 2022.

## 4. PEOPLE CENTRIC

### QUALITY OF LIFE, INCLUSIVE FUTURE OUR ADVANTAGE COMES FROM PEOPLE

ACCIONA Energía seeks to become the value proposal centred around people.

 **KEY MILESTONES 2021**

- > Deployment of functionalities in the internal tool of Support of the life cycle of employees.
- > Top Employer 2021 in Spain certification and excellence in people management.
- > 20% reduction in the accident frequency rate involving its own employees and contractors compared to 2019.
- > Approval of the Diversity and Inclusion Policy. Development of programmes as Sustainable 50:50.
- > Update of the Policy on Human Rights, which defines the due diligence strategy.
- > Implementation of the Internal Control System of Social Safeguards.

In 2020, the company devised a global strategy called **People** in order to put people at the centre through five fundamental pillars: recognition of merit, diversity and inclusion, transformative workplace, leadership and access to rights. In 2021, a year that disrupted people's lives, People has consolidated as a proposal of value to employees and to society and it forms part of the new 2025 Sustainability Master Plan, being the first of its strategic lines, with defined targets valued at the same level as the economic and environmental goals.

The post-pandemic scenario presents a highly challenging context for the coming years in which the company will develop its activity in increasingly more global and complex environments. The People strategy invests in people to include and empower the best diverse talent that will make the company stronger and more agile to face new challenges as well as opportunities and lead change.

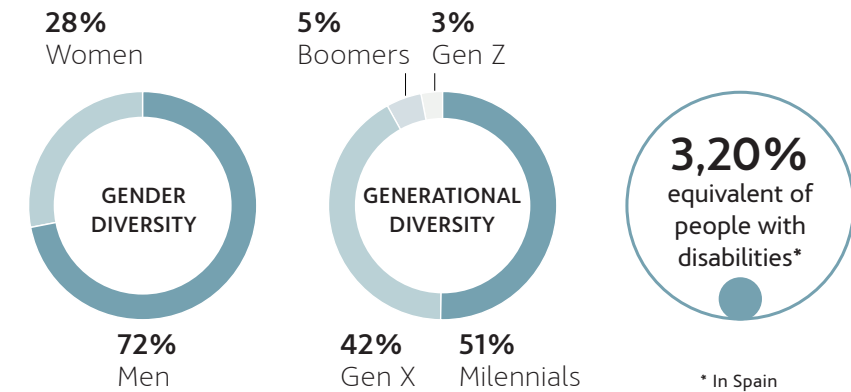

### THE SUSTAINABLE DIFFERENCE

ACCIONA Energía is formed by 1,762 persons

**Diversity and local impact**

45 nationalities

20 countries

### DIVERSITY AND INCLUSION

The “50:50 Sustainable” initiative actively promotes female participation and leadership in projects and production centres, thus promoting their full inclusion in sectors in which their contribution is not sufficiently represented, as well as in the energy sector.

- > **Project Grid Code Conecta 50:50, Spain.** 50% of women in the grid code team enabling energy project interconnection.
- > **Agora Energía Spain Project.** Programme for the inclusion of women in Wind Power Production in identified positions.
- > **Energía Chile Project.** Pool of female talent for maintenance operators in different wind farms and plants operating in Chile. Working hand-in-hand with nearby universities.
- > **Women in the Energía Mexico Isthmus Project.** Programme for attracting, selecting and developing indigenous women in the area of maintenance and operation. 10 female engineers were hired through this programme in 2021.
- > **Equipo Rosa. Puerto Libertad, Sonora, Mexico.** Programme to create long-term employment for women in vulnerable situations in the community in which the wind power operates. 40 trained and hired women.

## TRANSFORMATIVE ENVIRONMENTS

The company's safety and health strategy is based on excellence (zero accident target), continuous improvement and support to employed and subcontracted personnel. The possible risks involving health and safety at work arise from two of its main activities: construction and operation and maintenance of facilities.

The accident frequency rate with sick leave of employed and subcontracted personnel increased owing to the reduction in the total hours worked, especially in the construction activity.

Evolution of the frequency rate for employees and contractors

## ACCESS TO RIGHTS

In 2021, the company approved the Policy on Human Rights included in the Policy Book of ACCIONA Energía, which reflects the commitments and principles of action applicable to all the group's companies. The Policy, describes the strategy on Social Safeguard due diligence. In 2021, this approach was reinforced to design a preventive, strict and accurate mechanism to enable the company to identify, evaluate, prevent, mitigate, stop, monitor, report, address, rectify and account for real or potential adverse consequences of its activities to human rights. The strategy is composed of 8 key milestones:

1. Identification and assessment of real or potential impacts
2. Integration of the results of the impact assessments in internal processes
3. Mechanisms for reporting and claims
4. Remediation
5. Report
6. Follow-up of the efficacy of measures and continuous improvement
7. Promotion and training
8. Supervision and collaboration with the authorities

Highlighted matters	Principles of the Human Rights Policy	High-risk countries where ACCIONA Energía carries out activities	Installed power in high-risk countries
<b>Workers' fundamental rights and principles</b>	<ul style="list-style-type: none"> <li>&gt; Fair, dignified and respectful treatment of people</li> <li>&gt; Free work</li> <li>&gt; Commitment to the right to freedom of association, unionisation and collective bargaining and fair defence</li> <li>&gt; People's rights</li> </ul>	None	0.0%

## 5. PLANET POSITIVE

### TOWARDS A POSITIVE CONTRIBUTION INVEST TO REGENERATE THE PLANET

ACCIONA Energía's projects look for a positive impact on the planet, decarbonisation-based business models, conservation of the ecosystems and the circular use of resources.

#### KEY MILESTONES 2021

- > Reduction of GHG emissions compared to the base year 2017 by 71% (Scopes 1 and 2) in line with the science-based target, but Scope 3 emissions increased by 6%. Carbon neutrality in its direct operations maintained.
- > 100% CapEx aligned with sustainable activities according to the European taxonomy.
- > Voluntary planting of 74,947 trees.
- > Reduce the use of surface water, groundwater and municipal water in water-stressed areas by 35% compared to 2020.
- > Recovery of 96.5% non-hazardous waste.
- > Approval of a new Circular Economy Policy.

## CLIMATE

### A LOW-CARBON BUSINESS STRATEGY

The company presents a unique company profile, integrated in all the phases of the value chain: development, financing, engineering and construction, supply chain, O&M and the marketing of energy. This places the company in a unique position to lead the energy transition process to a decarbonised and electrified economy, based on renewable energy sources.

### GREENEST ELECTRICITY COMPANY IN THE WORLD FOR THE SEVENTH CONSECUTIVE YEAR

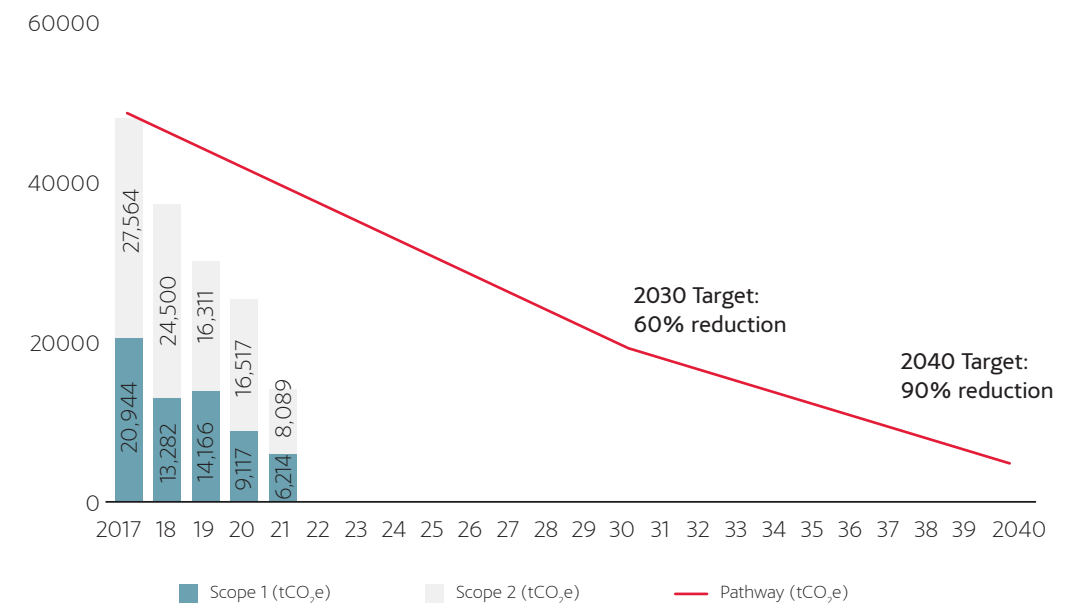

ACCIONA Energía has once again confirmed its position as the world's "greenest" electricity generation company, occupying the New Energy Top 100 Green Utilities ranking since 2015. This ranking is drawn up annually by Energy Intelligence, an independent consultancy firm specialised in energy markets.

### ALIGNMENT WITH THE EUROPEAN TAXONOMY OF ENVIRONMENTALLY SUSTAINABLE ECONOMIC ACTIVITIES

The EU taxonomy Regulation (EU Regulation 2020/852) helps to create the world's first 'green list', a classification system for sustainable economic activities, which will develop a common language for investors and companies when it comes to financing projects or goods and services with a substantial positive impact on the climate and the environment. Although reporting the alignment of ACCIONA Energía's activities with the taxonomy is not obligatory, the company has carried out and submitted to verification this analysis, with the following results:

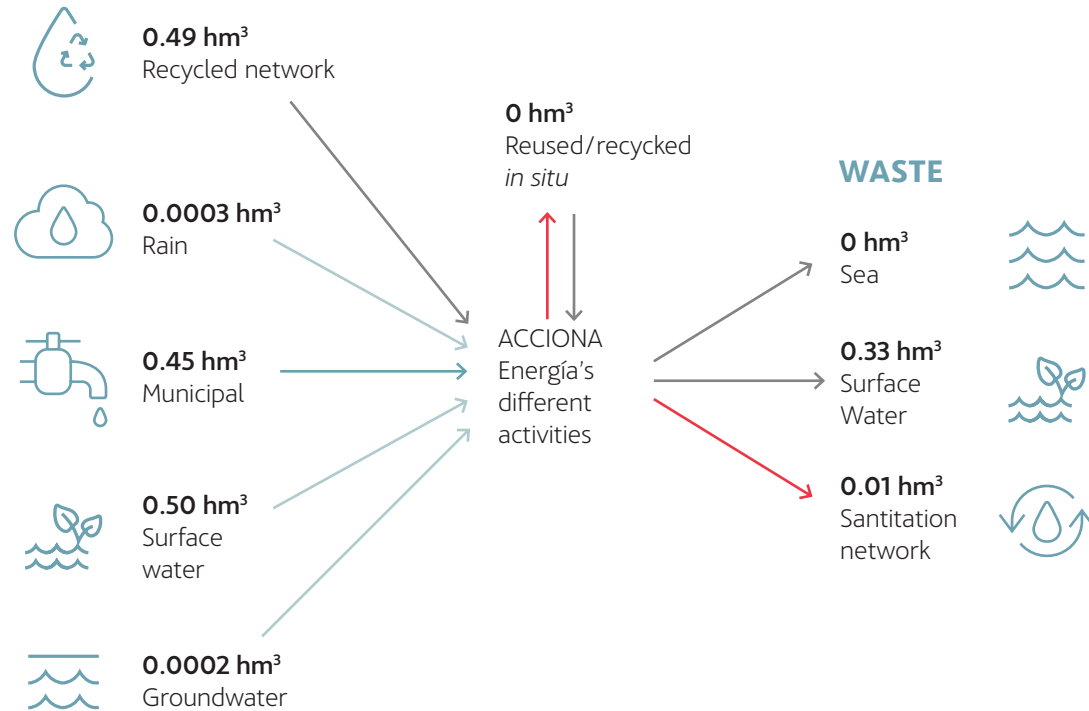

- > Turnover: 99.53% alignment
- > OpEx: 99.50% alignment
- > CapEx: 100 % alignment

### Evolution of generated emissions and net zero target (tCO<sub>2</sub>e)

**WATER**

**WATER USAGE IN 2021**

**BIODIVERSITY: VOLUNTARY PLANTATIONS**

According to the aim of ACCIONA Energía to invest to regenerate the planet, in 2021 the company planted trees voluntarily in some of the countries in which its assets are. By planting trees, the company contributes to fight global warming involving the absorption of CO<sub>2</sub>, thus promoting biodiversity as they provide food and shelter to animal species and reducing the erosive effect of the reforested land.

**A total of 74,947 trees were voluntarily planted.**

In Spain, 60,000 trees were planted for the reforestation of burnt Public Utility Mountains. The company participated in two projects: Public Utility Mount No. 60 "Valle De Iruelas" by planting 20,000 trees and the reforestation in Public Utility Mount No. 134 "Orzaduro" by planting 40,000 trees. The species used were wild pine tree (*Pinus sylvestris*), birch tree (*Betula alba*) and rowan (*Sorbus aucuparia*). The company undertook to keep the planted trees for at least 40 years.

**6. EXPONENTIAL LEADERSHIP**

**AUTHENTICITY, TRANSPARENCY  
WE PURSUE A PURPOSE**

ACCIONA Energía is not neutral. It has a deep commitment as an active participant in the sustainable transformation of this decade.

**KEY MILESTONES 2021**

- > Collaboration with firms developing batteries and storage systems in the Innovative Storage Hub.
- > Development of 100% renewable Campus initiatives and programmes.
- > Creating the Audit and Sustainability Committee.
- > Establishing a Framework Agreement for existing and future relationships between ACCIONA Energía and ACCIONA, after being listed on the stock exchange.
- > Launching a tool for managing communications of the Ethics Channel and setting up the Ethics Channel Committee.
- > 94% of contracts with local suppliers.

**GOVERNANCE**

**SUSTAINABLE ORIENTATION OF THE CORPORATE SOCIAL PURPOSE**

**Sustainable approach in the bylaws.**

The company's Articles of Association, approved in 2021, highlight the commitment of ACCIONA Energía to all stakeholders, positioning them at the same level: "The activities that comprise the corporate social purpose will be performed for the purpose of promoting more sustainable models of society. In the search for long-term value creation, ACCIONA Energía will safeguard the legitimate interests of shareholders, employees, suppliers, clients and other stakeholders, with the positive social and environmental impact of its activities benefiting the community and the planet".

**Financial and non-financial governance integration.**

ACCIONA Energía has created new governing bodies in 2021 on the occasion of its IPO. In order to fulfil its corporate purpose, it is necessary that the indicators on the sustainability policies that govern the company must be monitored and performed with the same discipline and thoroughness as its economic-financial indicators.

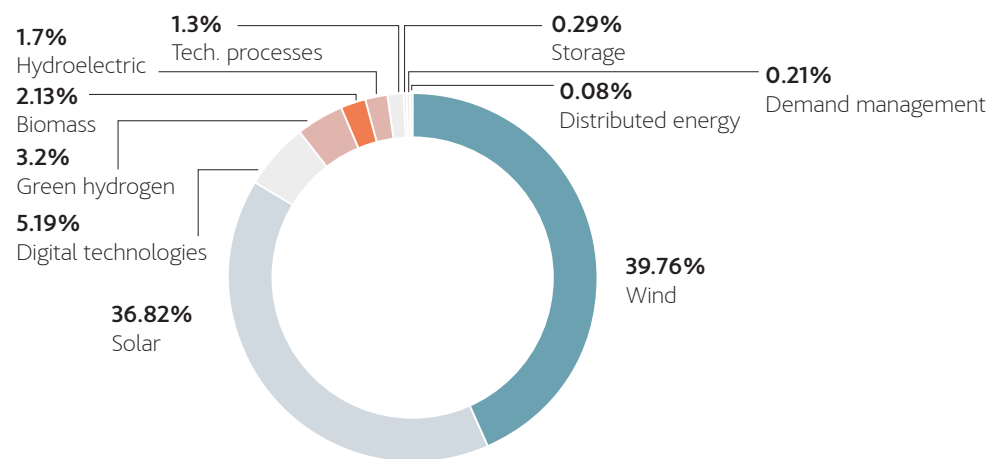

The operationalisation of the sustainable orientation of the corporate purpose will move forward in 2022 in the following steps:

- > Wording the company’s purpose
- > Introduction of a new leadership and remuneration model
- > Update of the Code of Conduct
- > Development of new “ACCIONA Well” workspaces

**SUSTAINABLE TRANSFORMATIVE INNOVATION**

In 2021, ACCIONA Energía reported spending €91.4 million on innovation, 14.3% more than the previous year. The portfolio of projects totalled 60, 40 of which were research projects and 20 innovation projects. The company has carried out 3 projects outside of Spain worth €75 million, representing 82% of the total innovation figure reported.

**Innovation figure per technology (%)**

**CUSTOMERS**

**Evolution of satisfied customers**

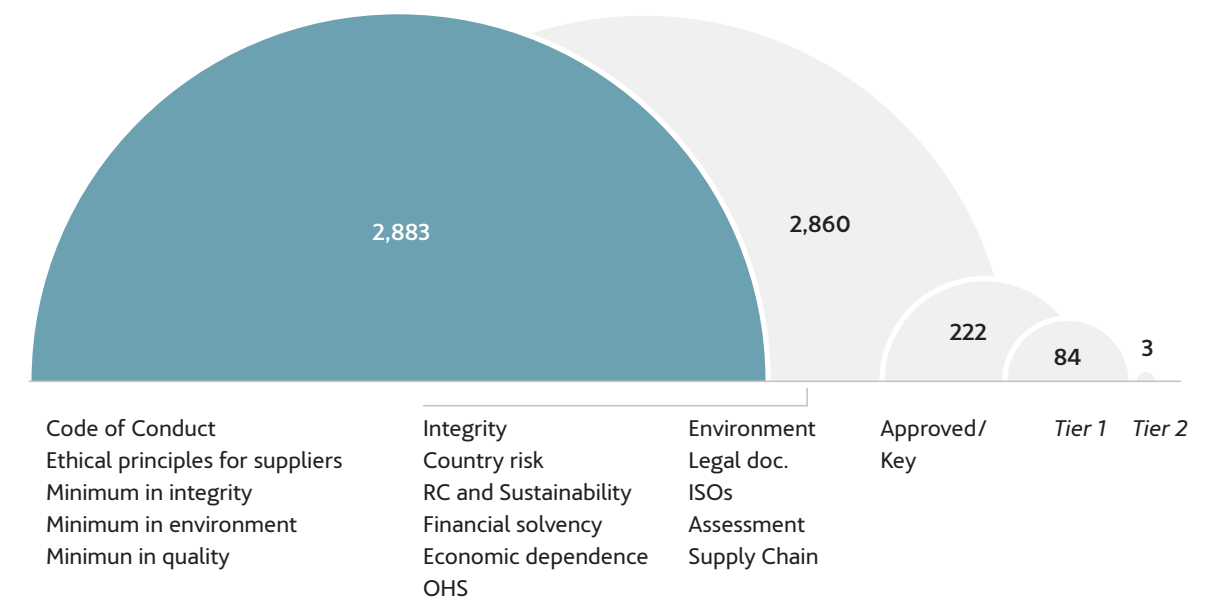

**SUPPLY CHAIN**

**Distribution of suppliers by type**

**SUPPLY CHAIN CONTROLS**

## 7. INTEGRATE TO TRANSFORM

### CONNECT TO IMPACT DIFFERENCE IN EVERY PROJECT

ACCIONA Energía has the capacity to create a unique sustainable difference with a portfolio of solutions perfectly aligned with sustainable transformation.

 **KEY MILESTONES 2021**

- > Improved socio-economic impact analysis of 41 projects.

---

- > 13% increase in the number of projects with Social Impact Management.

---

- > More than €3.2 million and 500,000 people benefiting from social initiatives.

---

- > Launch of the first inaugural bond for €500 million.

---

- > Pioneer funding of €2,500 million under the ESG “double impact” scheme.

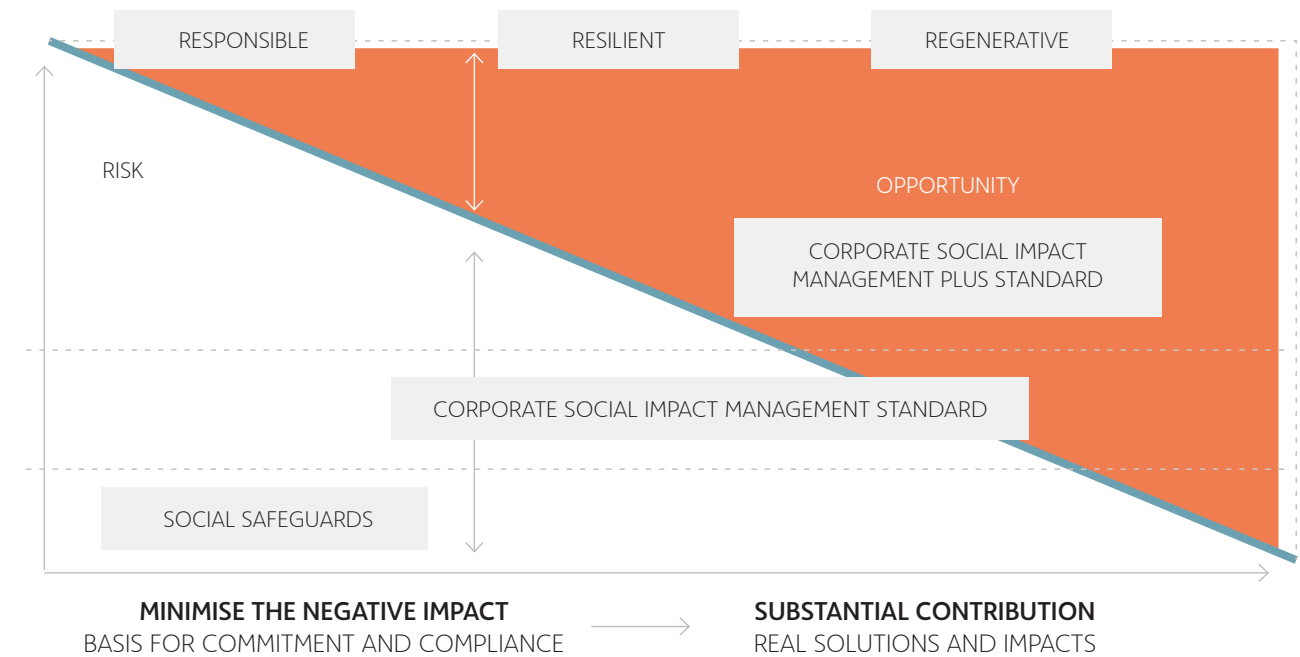

---

- > Best ESG score of the electricity sector from S&P Global Ratings.

### SOLUTIONS BASED APPROACH

The value proposition for this area of the Sustainability Master Plan 2025 is based on boosting the integrated infrastructures to maximise their contribution to the Sustainable Development Goals. The various departments of the company work together to design and offer their customers solutions that advance the achievement of the SDGs to the greatest possible extent.

### Evolution of the social management towards the regenerative approach

### SUSTAINABLE DIFFERENCE IN EVERY PROJECT

#### HIGH IMPACT SOLUTIONS

ACCIONA Energía seeks to enhance the transformative effect of its projects by maximising the impact they generate in terms of local impact, return on investment, and acceleration of sustainable development. To this end, it has designed the High Impact Solutions, which, through the inclusion of adjacent projects, contribute to improving the living conditions of the population and/or the environment in the vicinity of the company’s operations.

### Benefits of High Impact Solutions

- 1 ACCIONA Energía's project
  - 2 Positive social-environmental effects of the project
  - 3 Additional solutions on the basis of the gaps
- › They achieve material, quantifiable benefits
  - › They contribute to giving specific replies
  - › They increase the productivity of the project, making the most of its potential
  - › Measurable progress in line with the SDGs promoting access to basic services
  - › Involves and aligns different stakeholders
  - › Minimises risks of the project, creating links with nearby communities

### LOCAL ECOSYSTEMS

ACCIONA Energía's management of the social impact of its projects and services is a strategic component of its business model. During 2021, the company has applied the SIM methodology in 36 facilities.

#### Evolution of the implementation of Social Impact Management (SIM) methods

### COMMITMENT TO THE COMMUNITY

ACCIONA Energía understands that it has to be a major player in the economic development of the communities in the countries where it operates and is therefore committed to making contributions that improve the quality of people's lives. This commitment has translated into the following results:

- › Over € 3.2 million in social contributions to the community.
- › More than 500,000 people have benefited from the various social initiatives carried out.

### IMPACT FUNDING

ACCIONA Energía uses two mechanisms of sustainable financing: one aimed at projects or activities with sustainable goals intended to promote specific positive impacts associated to financing, and corporate financing that involves undertakings to improve the ESG performance of the whole company. During 2021:

- › During 2021, ACCIONA Energía has successfully set the price for its inaugural green bond, with a €500 million six-year issue.
- › In 2021, ACCIONA Energía signed a financing agreement linked to sustainability criteria for €2,500 million, which will enable it to coordinate its financial independence as a listed company.

### S&P awards ACCIONA Energía the highest ESG rating in the electricity sector

ACCIONA Energía has received the highest rating in the world electricity sector on environment, social and corporate governance issues (ESG) in a cross-sectoral evaluation made by S&P Global Ratings. ACCIONA Energía, which focuses exclusively on renewable energy, obtained a score of 86 points out of 100 in its ESG evaluation, making it the leading company in the sector and fifth at world-wide level in all sectors.
